

INTERACTIVE CommTech DEVELOPMENT S.A.

INNOVATIVE NETWORKING SOLUTIONS

About Us

Interactive CommTech Development is a telecommunication systems operator. Our company provides a large scale of specific products and services with voice, data and video applications.

If you are not sure which products you need for your application, or if you need help in selecting the correct applications for your requirements, we can offer you a networking implementation strategy.

Interactive CommTech offers its clients personalised communication solutions that can also be further integrated with different services and applications, at customer's request, repairs, monitoring and maintenance, configuration software etc. Our company assures smooth interoperability of applications within a rapidly changing diversity of equipment.

Our motto is to provide our customers with leading, innovative networking solutions.

Profile:

- Telecommunication services operator
- Smart applications and personalized services
- Networking implementation based on our experience in telecommunication

History:

- 1991: Mamon Impex SRL was founded;

- 1994: the team combined its efforts and formed Interactive Communications and Technologies Industries S.A.;
- 1994-2001: several projects in public and private telecommunications were analyzed. In 2001 Interactive Commtech Development SA was founded. It specialized in public and private telecommunication systems and took over those projects. ICTD also assumed the projects and clients of its predecessor companies.
